

Technical Specification

Dauntless is a high speed workboat combining the latest marine technologies with excellent sea holding, comfort and safety.

She is ideally suited to inshore windfarm projects, environmental monitoring surveys, training and fast crew transit.

Lauded with many class awards from the motor boat press—this rugged vessel has a large aft-deck with low lying freeboard platform for deployment applications.

Dauntless can be configured for PAM, magnetometer, R.O.V. and side scan sonar purposes.
